

## Volume contents

### Volume 98 (1997)

Evaluating forest growth models	1
J.K. Vancley (Jakarta, Indonesia) and J.P. Skovsgaard (Hørsholm, Denmark) . . . . .	
Biased predictions for tree height increment models developed from smoothed 'data'	13
H. Hasenauer (Vienna, Austria) and R.A. Monserud (Moscow, ID, USA) . . . . .	
Applicability of the forest stand growth simulator PROGNAUS for the Austrian part of the Bohemian Massif	23
H. Sterba (Vienna, Austria) and R. A. Monserud (ID, USA) . . . . .	
Testing models of unthinned red pine plantation dynamics using a modified Bakuzis matrix of stand properties	35
R.A. Leary (St. Paul, Minnesota, USA) . . . . .	
A framework for uncertainty assessment of mechanistic forest growth models: a neural network example	47
B.T. Guan (Taipei, Taiwan, ROC), G.Z. Gertner and P. Parysow (Urbana, IL, USA) . . . . .	
Virtual experimentation: conceptual models and hypothesis testing of ecological scenarios	59
P. Parysow and G. Gertner (Urbana, IL, USA) . . . . .	
Propagating uncertainty through spatial estimation processes for old-growth subalpine forests using sequential Gaussian simulation in GIS	73
H.T. Mowrer (Fort Collins, Colorado, USA) . . . . .	
Modelling effects of curtain method on algal blooming in reservoirs	89
D.G. Nimal Priyantha, T. Asaeda (Saitama, Japan), S. Saitoh and K. Gotoh (Fukuoka, Japan) . . . . .	
Calculating temperature dependence over long time periods: derivation of methods	105
H. Lischke, T.J. Löffler and A. Fischlin (Schlieren, Switzerland) . . . . .	
The significance of optical properties in competition among visual and tactile planktivores: a theoretical study	123
K. Eiane, D.L. Aksnes and J. Giske (Bergen, Norway) . . . . .	
A mathematical model of an estuarine seagrass	137
J. Wortmann, J.W. Hearne (Pietermaritzburg, South Africa) and J.B. Adams (Elizabeth, South Africa) . . . . .	
Modelling contaminant effects on deposit feeding nematodes near Gulf of Mexico production platforms	151
P.A. Montagna and J. Li (Port Aransas, TX, USA) . . . . .	
A modelling analysis on dynamics of hilly sandy grassland landscapes using spatial simulation	163
Q. Gao, N. Liang and X. Dong (Beijing, People's Republic of China) . . . . .	
Prediction of functional characteristics of ecosystems: a comparison of artificial neural networks and regression models	173
J.M. Paruelo (Buenos Aires, Argentina) and F. Tomasel (Fort Collins, CO, USA) . . . . .	
A simulation model of the infection cycle of <i>Leishmania mexicana</i> in <i>Neotoma micropus</i>	187
S.F. Kerr (San Antonio, Texas, USA), W.E. Grant and N.O. Dronen, Jr (Texas, USA) . . . . .	
A model for the simulation of macroalgal population dynamics and productivity	199
P. Duarte and J.G. Ferreira (Monte de Caparica, Portugal) . . . . .	
POLMOD.PEST—the model of pesticides dynamics in the elementary ecosystems	215
Y.A. Pykh (St. Petersburg, Russia) and I.G. Malkina-Pykh (Moscow, Russia) . . . . .	
Logistic regression and continuation ratio models to estimate insect development under variable temperatures	237
S. Manel and D. Debouzie (Villeurbanne, France) . . . . .	
Book review . . . . .	245
Author index . . . . .	249
Subject index . . . . .	253
Volume contents . . . . .	255
